DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closet prior art of record (Narad et al., U.S. Patent No. 6,157,955) does not teach nor suggest in detail the limitation of a non-sequential packet classification process that is configurable to cause the processor to skip to a particular non-initial bit of the given packet at a time during the classification process after which the particular non-initial bit has been processed, such that multiple passes of the classification process can be performed on the given process as well as the combination of all the limitations within the independent claims as argued by Applicant (see page 6 of applicant's response, as well as page 8, lines 15-29 of Applicant's enabling portions of the specification). Furthermore, prior art of record Moberg et al. (Moberg), U.S. Patent No. 6,907,468 fails to disclose the details of these limitation. Eventhough, Moberg does state non-sequential skip. However Moberg does not provide for the details of the distinguishing limitations. So as indicated by the above statements, Applicant's arguments have been considered persuasive, in light of the claim limitations as well as the enabling portions of the specification.

2. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
